Bethel Environmental Solutions, LLC. (BES) realized that environmental decisions can greatly affect life and business. BES understands that to make sensible business decisions, an understanding of our client's business and need is critical to developing proper solution. The project specific environmental factors must be identified, quantified and if necessary mitigated. This Capability Statement (CS) presents BES capability to provide and conduct a complementary range of environmental services for clients.

BES is a minority-owned environmental consulting and remediation firm serving Maryland, District of Columbia and Virginia. Our objective is to provide support services for our clients by providing quality technical services at a fair and reasonable cost. Since our founding, [BES has successfully completed many projects supporting our client's needs for environmental surveys and site abatement for Asbestos Containing Materials \(ACM\), survey and site abatement for mold and survey and site abatement for lead-based paint \(LBP\). BES also removes Underground Storage Tanks \(UST\) and engages in Interior and Exterior Demolition.](#)

BES is committed to exceptional client service with the utmost professional integrity. Our staff is technically proficient with many years of professional project experience. Our projects range from tens of thousands to hundreds of thousands of dollars involving complex issues that demand a project team with diverse skills.

Capabilities and Experience

As an environmental consulting and remediation firm, BES has resources to manage your environmental needs. Our services are:

Site preparation

Site remediation

Asbestos Containing Materials Surveys, O&M Plans and Abatement Management

Mold surveys and Abatement Management

Lead-Based Paint Surveys and Abatement Management

Underground Storage Tank Removal

Interior and Exterior Demolition

Asbestos-Containing Material Surveys O&M Plans Abatement Management

BES staff have considerable experience in managing and performing destructive and non-destructive suspected ACM surveys at site ranging from single structures to multiple locations. BES experience includes performing preliminary and all-inclusive asbestos surveys, for the renovation or demolition multi-family housing, commercial and industrial facilities and the preparation of operations and management plans providing guidance for those areas where ACM is managed in place.

Lead-Based Paint Surveys, Management and abatement

Concern for Lead-based paint (LBP) is primarily related to residential structures and other facilities where children are routinely present or when facility improvements are considered where human exposure occurs. BES performs LBP surveys in association with our preparation of Operations Management (O&M) Plans for those facilities where LBP is managed in-place, in addition to preliminary surveys, and surveys associated with facility improvements (demolition and disposal). Our personnel are experienced in state and local landfill regulations and the necessary analysis required to assess disposal options for LBP painted construction debris. BES staff are qualified to conduct LBP surveys in many of the states who have adopted LBP assessor certification/licensing regulations

Mold Surveys and Abatement Management

The environmental impact, health hazard and property damage potential of mold growth cannot be over emphasized. BES has the requisite knowledge and competence to survey, inspect and abate any mold growth and restore property and atmosphere to its original form. BES also tests and restores Air Quality to its acceptable public health level.

Underground Storage Tank Removal and Remediation

BES is licensed to remove UST that are old disused and no longer wanted. Many of these tanks are old and have leaked and contaminated the surrounding soil. BES will professionally survey and assess the state of the tanks, get the products therein removed if any, dispose of the tank and excavate the surrounding soil if contaminated, then back-fill to restore land to its original form.

Interior and Exterior Demolition and Razing

BES has over the years perfected the process for interior and exterior demolition and full and complete demolition and razing. We are staffed with experienced personnel who are versed in the art of demolishing and razing structures. We always guarantee good works

Bethel Environmental Solutions, LLC., Clients

The high quality of BES work and our commitment to customer satisfaction has been well received. Client satisfaction is reflected in the very level of repeat business and client referrals we receive. We are proud to provide references upon request as examples of customers for whom we are currently providing services.
